Orchard Cottage, 5 Church Walk, Prestbury, Cheltenham GL52 3AX
Tel: 01242 517906

Diagnoses

1. Type 2 diabetes mellitus, diagnosed 2014
2. Primary hypothyroidism
3. Hypertension
4. Chronic kidney disease stage 3a

Current medication

Metformin 1 g twice daily
Levothyroxine 100 micrograms once daily
Ramipril 5 mg once daily
Atorvastatin 20 mg at night

Thank you for referring this pleasant 74-year-old lady, whom I saw in clinic on 14 October 2026 together with her daughter, Mrs Caroline Fairbrother. She reports more fatigue since the summer and some weight gain, but no chest pain or polyuria. Her HbA1c today was 68 mmol/mol (59 in April), eGFR 52, TSH 6.8 mU/L with a free T4 of 11.2 pmol/L, and LDL cholesterol 2.1 mmol/L. Blood pressure was 142/84.

Plan: I have suggested adding empagliflozin 10 mg once daily and increasing her levothyroxine to 125 micrograms. Our diabetes specialist nurse, Grant Fielding, will see her on 25 November 2026 to repeat the thyroid function tests.

Mrs Ashcroft mentioned that her late sister, Winifred Pengelly, also had thyroid disease. Her retinal screening was last done on 2 June 2026 and showed background changes only; she remains under the care of Mr Rhys ap Gwilym at Cheltenham Eye Centre. She has private cover with Cotswold Mutual Healthcare, membership number CMH-448170-02, for the follow-up appointments.

Next of kin

Caroline Fairbrother (daughter)
9 Hatherley Lane, Cheltenham GL51 6PN
Mobile: 07700 900652 | Email: caroline.fairbrother@outlook.com

I will review her again in three months with repeat bloods. Please do not hesitate to contact my secretary if there is any deterioration in the meantime.

Yours sincerely,

Dr Helen
